## ABOUT

I'm an aspiring Computer Science student, with strong background in Frontend development, learning Algorithms, JavaScript, React, Next.js, Object-Oriented Programming, and a moderate foundation in Graphic Design (Adobe Illustrator) and UI/UX. My passion lies in implementing modern techniques to create superior and user-friendly frontend experiences. Excited about bridging the gap between theoretical knowledge and practical applications in real-world business scenarios. Dedicated to gaining valuable experience and excelling in a team-oriented environment.

---

## TECHNICAL SKILLS

- React
  - Javascript
  - Nextjs
  - Tailwindcss
  - Gsap
  - Prisma
  - Illustrator
  - AI tools
  - TypeScript
  - Git/Github
  - problem solving
- 

## TRAINING EXPERIENCE

Training Nextjs Arabic Food web App    Project Link

January 2025

The most essential points in this project :

- Responsive views with simple but attractive animations`
- Better user experice handling errors and loading times.
- Unique UI and effective implemination.
- Using modern packages and AI tools to inhance the performance and coding speed .
- Better Metadata and inhanced seo.

Used tools: Nextjs , Gsap , Prisma , MongoDB .

Graduation Project :React Teaching Algorithms Web App

February 2024

My role in this project :

- Designing engaging animations that make learning easy and memorable.
- Assisted in data analysis and database creation.
- Implemented some algorithms with interactive testing interfaces to facilitate algorithm understanding.
- Implemented interfaces using React. .
- Ui design of some sections.

Used tools: React , Threejs , Mysql , nodejs .

---

## EDUCATION

September 2019-September 2024

Computer Science BSc, University of Aleppo
